

TX215

600-WATT 15-INCH 2-WAY POWERED LOUDSPEAKER

TX2 Series from Alto Professional Powered Loudspeakers for the Serious Performer

With the TX2 Series, Alto Professional has created a family of powered loudspeakers suitable for your most demanding gigs, night after night. Utilizing much of the technology of our acclaimed TS3 series, the new TX2 Series delivers the power and clarity you need to sound your best.

There are four models in the range—the 300-watt TX208 and 210, and the 600-watt TX212 and TX215. They are all bi-amplified 2-way designs, with a long-excursion woofer and a 1-inch titanium compression driver in a newly-designed precision horn. This new horn design improves the high-frequency performance and produces a very precise 90°H X 60°V radiation pattern—ideal for optimal audience coverage.

The TX2 Series features a new ID, resulting in rugged, lightweight, easily-transportable cabinets. Their trapezoidal shape enables either upright or wedge monitor positioning and the full-sized steel grille gives complete driver protection. These speakers are built for continuous heavy-duty use. Add to that their full complement of inputs/outputs and mounting options and it's easy to see that the TX2 Series plays an indispensable role in your performance.

All information is preliminary and subject to change.

FEATURES
